

**TOWN OF VONDA**  
**WATER & SEWER CONNECTION POLICY**  
**DATED AUGUST 22, 2007**

As a term of supplying the public utility to any parcel of land, the Town of Vonda Council states that the owner of the parcel of land is responsible for the costs of the connection of water and sewer services from the main line to their parcel of land.

This connection will exclude the supply of the curb valve, which will be supplied by the Town of Vonda.

All installation and connection must be supervised by the Vonda Town Foreman or an alternate designated representative of the Town of Vonda.

The Town of Vonda reserves the right to specify and approve all materials to be used in the connection of water and sewer services.

After connection of water and sewer services, the Town of Vonda is responsible for the maintenance of these lines from the main to the curb valve only.

Where new subdivision or development is proposed, and existing water and sewer lines are not present, it shall be the responsibility of the developer to install and connect new water and sewer lines to service the new development.

The Town of Vonda reserves the right to specify and approve all materials to be used in the installation and connection of all water and sewer services.

This Water and Sewer Connection Policy is dated this 22<sup>nd</sup> day of August, 2007.
